Analyst - BI Developer

Power BI| Power Automate| SQL | License Management | DAX

Results-driven IT professional with 2.7 years of experience seeking a Software Licensing Services (SLS) Analyst role to apply my expertise in data analysis, software management, and IT service processes to support software asset management and licensing operations. Adept at working with large datasets, generating meaningful insights, and supporting client requirements with high accuracy and efficiency. Looking forward to contributing to software licensing optimization, compliance, and operational excellence while continuously enhancing my knowledge in SAM tools, licensing models, and lifecycle services within a growth oriented organization like Insight.

PROFESSIONAL EXPERIENCE

Company: Accenture

Role: Packaged Application Development Associate **Aug 2023 - Feb 2025**

Refresh Tracker

Tech stack: Power BI, Analytical Views (Sprint Boards), Incident Management, License Management

Contributions:

- Designed and implemented a consolidated reporting framework in Power Bl, utilizing SharePoint Lists as the central data collection source.
- Developed and maintained an automated Deployment Tracker dashboard monitoring ticket status and migration success rates across Dev-UAT-Prod, reducing manual checks by 60%.
- Collaborated with clients and stakeholders to stabilize a disrupted project in 4 weeks, earning formal recognition for impact.
- Re-engineered legacy Power Automate flows to match new business logic, increasing workflow accuracy by 40%
- Managed license provisioning and handled 300+ incidents monthly, ensuring 99.9% system uptime and rapid resolution.

Company: Accenture

Role: Packaged Application Development Analyst **Mar 2025-Mar 2026**

ADO Analysis Report

Tech stack: Power BI, Analytical Views (Sprint Boards), Incident Management, License Management

Contributions:

- Connected and modelled raw sprint work items from Azure DevOps to Power Bl, creating a single source of truth for project status
- Designed and deployed interactive dashboards to track core project metrics, including Team Velocity, Sprint Burndown, and Cycle Time, enabling leadership to proactively identify.
- Leveraged Power Query (M) to transform complex task hierarchies, ensuring accurate categorization and aggregation of work activity
